EXAMINERS AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and /or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it must be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Terrence L. Wong (Reg. No. 55,741) on March 3, 2006.

3. The application has been amended as follows:

Claims 1, 7, 20 and 21 have been replaced with the following amended claims 1, 7, 20 and 21

1. (currently amended) An interface for facilitating browsing of an indexed collection of electronic content, comprising:

~~means for~~ determining a current location within an index associated with the indexed collection of electronic content while browsing the indexed collection of electronic content;

a non-visual display device for displaying information identifying the current location;

a location display resolution controlling device for controlling the resolution with which the information identifying the current location is displayed by the non-visual display device; and

a non-visual resolution feedback device for providing non-visual feedback representative of a current resolution with which the information identifying the current location that is currently being displayed by the non-visual display device;

wherein the non-visual device display further comprises a haptic display device;
and

wherein the haptic display device further comprises identifying individual records by providing a distinct haptic feedback for each record while navigating through the records in the indexed collection of electronic content.

7. (currently amended) An interface as in claim 1, further comprising a browsing device for controlling the current location within the ~~index~~ indexed collection of electronic content.

19. (currently amended) A method for facilitating browsing of an indexed collection of electronic content, comprising the steps of:

determining a current location within an index associated with the indexed collection of electronic content while browsing the indexed collection of electronic content;

displaying information identifying the current location with a non-visual display device;

controlling the resolution with which the information identifying the current location is displayed by the non-visual display device with a location display resolution controlling device; and

providing non-visual feedback representative of a current resolution with which the information identifying the current location that is currently being displayed by the non-visual display device with a non-visual resolution feedback device;

wherein the non-visual device display further comprises a haptic display device;
and

wherein the haptic display device further comprises identifying individual records by providing a distinct haptic feedback for each record while navigating through the records in the indexed collection of electronic content.

20. (currently amended) A computer readable storage medium or media on which is stored one or more computer programs for providing an interface for facilitating browsing of an indexed collection of electronic content, the one or more computer programs comprising:

instruction for determining a current location within an index associated with the indexed collection of electronic content while browsing the indexed collection of electronic content;

instructions for displaying information identifying the current location with a non-visual display device;

instructions for controlling the resolution with which the information identifying the current location is displayed by the non-visual display device with a location display resolution controlling device; and

instructions for providing non-visual feedback representative of a current resolution with which the information identifying the current location that is currently

being displayed by the non-visual display device with a non-visual resolution feedback device;

wherein the non-visual device display further comprises a haptic display device;

and

wherein the haptic display device further comprises identifying individual records by providing a distinct haptic feedback for each record while navigating through the records in the indexed collection of electronic content.

REASONS FOR ALLOWANCE

4. The following is an Examiner's Statement of Reasons for Allowance:

Claims 1-2, 6-9 and 11-20 are allowable over the prior art of record.

The examiner has found that the prior art of record does not teach or suggest or render obvious a system, method and computer readable storage medium for facilitating browsing of an indexed collection of electronic content. The major difference in the independent claims not found in the prior art of record is that the displayed information identifying the current location of a record is displayed using a non-visual (haptic) display device. Furthermore, the haptic display device comprises identifying individual records by providing a distinct haptic feedback for each record while navigating through the records in the indexed collection of electronic content as set forth in the specification and recited in the independent claims 1, 19 and 20.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
